Equipment Sales Division

Mtandt has been the pioneer in offering productivity and safety solutions to Indian companies since 1974. With an increased emphasis on safety and improving productivity, Mtandt offers a varied range of solutions across categories.

Mtandt is a company founded and run by safety professionals and work-at-height specialist. Using the firsthand experience and knowledge of the safety standards and needs of the Industry, Equipment Sales Division of Mtandt Group, offers state-of-the-art equipment for people and material lifting. Mtandt has collaborated with leading organisations in the world to offer the best solutions to its customers for reach and work-at-height and material handling and management.

VERTICAL ACCESS

- Powered & Mobile Access Platform System
- Personal Mast Lift
- Mast Boom Lift
- Scissor Lift

AERIAL WORK

- Telescopic Boom Lift
- Articulated Boom Lift (Wheel / Crawler / Spider)
- Truck Mounted Boom Lift
- Insulated Aerial Work Platform
- Fire Fighting Work Platform

MATERIAL HANDLING

- Truck Loader Crane
- Tele Handler
- Knuckle Boom Crane
- Mini / Spider Crawler Cranes
- Recycling Crane
- Hook Ladder
- Special Purpose Crane for Marine and Railroad
- Road Sweeper
- Tree Cutting Equipment

Mtandt also owns the two cult brands of People Lifting Equipment.

Rentals

Mtandt provides India's largest fleet of rental equipment for industrial operations and commercial construction companies, as well as public and private works. With branch locations throughout India, 24/7 service and support Mtandt Rentals make absolute sense when cash flow and CapEx management is critical to any operations success.

Mtandt offers trained and certified operators, onsite maintenance and repair thereby requiring zero resource allocation for storage and maintenance - making renting equipment the right choice for smart project managers

With the experience of 40+ years, equipment from world-renowned manufacturers, trained

and certified operators, Mtandt Group's Rental division is your one-stop source for the following equipment rentals:

- Self Propelled Boom lifts and Scissors lift.
- Temporary Access and Ground Protection Mats
- Aluminium Scaffolds
- Road Sweeping Machines
- Mini Crawler Cranes
- Telehandlers
- Rack & Pinion Hoists
- Tower Cranes
- Rope suspended Platforms
- Special Purpose Machines and Tools

Each equipment rented is certified fit to use and meets all safety and government compliance.

Being the pioneers and leaders in the rental equipment space, Mtandt has deployed its equipment on rent across various industries and applications like:

- Construction & Infrastructure
- Manufacturing Plants
- Every kind of Commercial, Entertainment, Education, Religious, Architectural or Historic Institutions and Facilities
- Government Utilities and Infrastructure like Airports, Ports, Metro stations, Railroad stations, Switch Yards, etc.

Engineered safety
solutions & safety skills
training for a
safe workforce.

TsaF

(Tactical Safety for Access & Falls)

TsaF is your intrinsic safety partner for Horizontal, Vertical and Overhead Lifeline Systems, Web Nettings & Deck and a trusted leader for Training and Certification for working-at-height.

What makes TsaF the first choice for industries leaders across Solar to Oil & Gas, Pharma to Construction sectors:

- **Customization:** To your unique site dimensions and varied application formats - offering multiple choices to your challenges.
- **Safety & Quality:** Where each component is a result of extensive research & development and is crafted to precision, using state-of-the-art manufacturing technology.
- **Experienced Crew:** to carry out the installation whilst adhering to benchmarked HSE and Quality parameters.
- **Global Standards:** Certified ISO 9001:2015 operator and TsaF systems are EN 795, EN 353-1:2014+A1:2017, EN 353-2:2002 certified.
- **Industry designed curriculum:** covering all the finer nuances required for operating equipment and working-at-height. This ensures that the certified talent can be deployed quickly across sectors on course completion.

Growing safety standards in the industry demands **fall protection solutions** to arrest workers in the event of a fall or restrain workers from reaching a fall hazard. The solutions offered are:

- Horizontal Lifeline System
- Overhead Lifeline Systems for loading bays and other applications
- Vertical Lifeline System
- Aluminium Barricade
- Skylight Mesh
- Flowlock Ladder
- Aluminium Walkway

TsaF has a structured AMC contract which covers testing, maintenance and re-certification of the system. Senior Quality Installers carry out line-span sag check, endpoint checks, critical components functionality torque checks on all fasteners.

Apart from the right tools and equipment, the right knowledge to operate them is essential to create a safe working environment. Mtandt offers training courses which are created by the industry experts for nurturing operators on the following areas:

- Work-at-Height Training
- Mobile Access Platform System Training
- Forklift Training
- First Aid and Basic Life Support Training
- Drivers & Operators Training (Boom Lifts and Scissor Lift)

Each course is customized for different levels of people in an organization, starting from operators to supervisors to fleet managers.

TsaF, also partners for offering Safety Gap Analysis for working-at-heights project services for inspection, maintenance and repair at heights.

Composite Infra Division

Composite Infra Division specializes in providing high class engineered products ranging from Temporary Access Solutions to Permanent Civil Engineering Projects.

Developed based on industry demands and after years of experience in providing solutions for more extreme weather and ground conditions, the following have been created for varied applications:

PORTADECK

Temporary Access and Ground Protection Mat: for buoyant, temporary, heavy-duty access across the soft ground and extreme wet & cold weather conditions. A heavy-duty mat ideal for temporary road & equipment staging area:

Highlights:

- Patented process compression moulded thermoplast
- Overlap lip feature helps interlock mats to make uniform platform or road
- Compressive strength more than 425 tons/m² reaching max 730 ton/m²
- Unique both side traction surface, suitable for tyre & metal tracks
- Foam field core to prevent water incursion

Having passed stringent quality, temperature, bending, load test, compression test and cycling mat test, Portadeck is the first choice for a temporary access solution across various industries and application like Oil & Gas Exploration, Construction, Petrochemical, Tower Installation, Pipeline Laying, Mining, Commercial timber and woodlands operations, Utilities, Natural Disaster Management, Events and many more...

PORTADECK MAT & PADS

An extension of the Portadeck family, these mats & pads are ideal for light-duty applications and can support vehicle / equipment weight up to 80 MT. Easy to apply with a team of 2 people and capability for hand cut-outs, the Portadeck Mat becomes fast and easy to install using a choice of connection options. Eco-sustainable with 100% recyclable at the end of its shelf life.

Its ease of application makes it ideal for various sectors/utilities like emergency access, utility construction and civil engineering, drilling contractors, landscapes, transmission, events, temporary road and work areas, hard and soft landscaping work, sports facilities and recreational grounds, pedestrian walkways or any project requiring safe temporary access for vehicles and equipment.

PORTACELL

Mtandt is marketing various types of Geocell under the brand name "Portacell"; a revolutionary concept that is aligned to the engineering needs of infrastructure industry, to provide long term cost effective solution in applications like load support, highways, railways, ports, slope protection, channel protection and earth retention systems.

Geocell is a proven mechanical soil stabilization technology used across 80 countries over 20 years and is verified by leading agencies like ISO, ASTM, UK Ministry of Defence, United Nations among others.

Maintenance, Repair & Operation Supplies

Mtandt is India's trusted source for industrial supplies and safety products. For over 40 years, Mtandt has a strong focus on improving safety, productivity and convenience by offering best in class PPEs and Tools from most trusted Fortune 500 brands across the Globe.

Catering to the everyday needs of engineering fraternity through maximum coverage, Mtandt has been providing real-time solutions to simple or complex needs of the ever-growing market and customers:

- Personal Protective equipment
- Tools, tackles and consumables
- Material Handling Solutions
- Traffic Management Solutions
- Fire Protection solutions
- Measuring Equipment and meters
- First Aid and Rescue solutions
- Ladders and climbing solutions
- Innovative products and Solutions

Mtandt helps customers in identifying safety and productivity gaps to suggest the most economical and precise products from a wide choice to select from the following essential solution packages:

- PPE Mapping and Assessment
- Process-based Tool cabinet design
- Visual Lockout Procedure and implementation
- Facility identification survey
- Visual management audit
- Arc flash audit
- Hand protection guardian survey
- Confined space audit and safety precaution implementation
- Right tackle for right task – Material handling survey
- Work-at-height gap analysis – 360 deg analysis
- First aid and fire fighting training

Mtandt listens to its customers and offer what they need by keeping things simple and basics strong.

The Mtandt Advantage

PIONEER

Mtandt has a pulse on how the industry is evolving - right from gauging how the trends will dictate the future to anticipating what the customers will require. This has ensured that every business the group has led into has been a pioneering step in that direction for the industry.

MARKET LEADER

With a strong focus on quality & services, coupled with innovation and technology - Mtandt is the key player in every segment it operates in.

PARTNERSHIP APPROACH

Be it with customers or team members, partners or society - the approach has always been on partnering & well being of all stakeholders in the Mtandt growth story.

SOLUTION FOCUSSED

While others sell products and services - Mtandt offers solution. This critical distinction ensures that Mtandt has the right solution to any challenge that a company faces.

VALUE DRIVEN

With Honesty, Kindness, Respect and Transparency at the core of the Mtandt culture, the customers are assured of a strong and dynamic system for operational efficiency - truly dependable and driven by ethics.

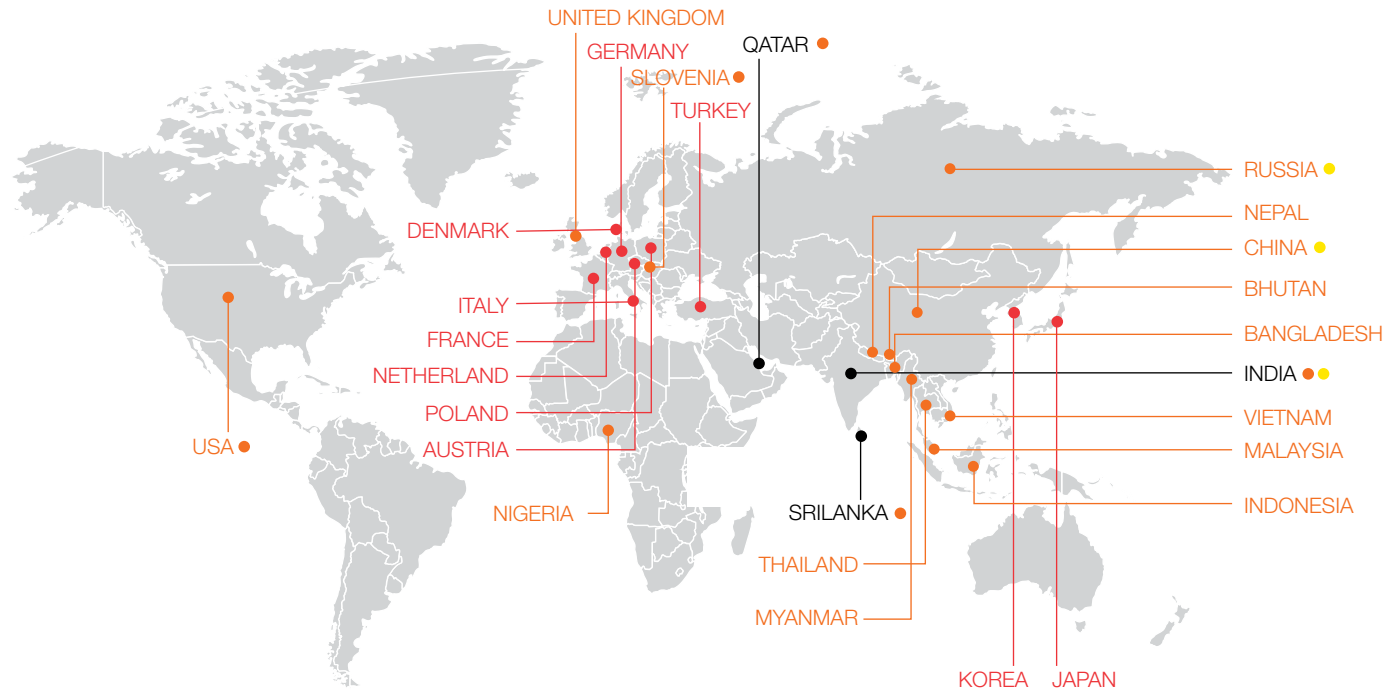

Working with the best

Mtandt works with the most innovative and people focussed companies in the world. Mtandt clients being market-makers, pioneers, and revolutionaries is a testimony to the value that the group brings to the table.
